

Submission Summary

Conference Name

2022 IEEE 5th International Conference on Computing, Power and Communication Technologies (GUCON)

Paper ID

385

Paper Title

BVRITH INTRANET MOBILE AAP

Abstract

The use of mobile devices in our everyday lives has resulted in a technical and cultural transformation in society. The access to information via this platform is significantly changing how we perform our daily activities such as searching, purchasing, dealing with the government, and learning. As we all know, mobile applications are user friendly and simple to use, so we want to create an app called Intranet that includes some of the features of our website called ECAP as well as additional functionalities like student graduate survey, student leaves, student achievements, faculty achievements, faculty leaves, course attainments, and so on
